

Your bathtub or bath fixture has just been refinished with the finest product in tub and tile resurfacing used today!

To maintain the beauty of your tub surface:

1. As with a new bathtub, remove excess water and wipe dry after each use
2. Always be sure faucets are tightly closed and the shower pipe is drained after each use.
3. DO NOT rest any soap bottles, spray cans, or wet clothes on the surface for long periods of time
4. NEVER use hair dye in a refinished bathtub
5. If bathing pets in the bathtub, always put a towel down to prevent scratches

Bathmats:

1. If you do not have a non-slip surface applied and you find the surface too slippery, you can use a NON-Suctioned bath mat or a towel. It must be picked up after each use. Do not hang the mat or towel over the bathtub.

Use of a suctioned bath mat or stick-on strips will cause failures.

DON'T FORGET YOU CAN HAVE A NON-SLIP SURFACE APPLIED AT ANY TIME FOR \$99.00

Cleaning:

1. Even though the bathtub does not look dirty, it should be cleaned at least once a week with a liquid non-abrasive cleaner such as Scrubbing Bubbles (recommended), 409, or Fantastic.
2. NEVER USE abrasive cleaners such as Ajax, Comet, or Soft Scrub on the refinished surface. If non-slip protection is applied on the bottom of the bathtub, you can use Soft Scrub on that area as needed.

Remember: if you treat your new surface with respect, clean it regularly and keep your taps dry, your tub will stay shiny and bright for many years.
